

Installing Mats with Hook-Style Retention

1. Once the mat is positioned appropriately, locate the retention under the mat and align the hole to hover over the hook.
2. When the hole and the hook are aligned, apply some force by both sides of the ring to allow the hook to poke through and lock the retention in place.

Removing Mats With Hook-Style Retention

To remove the mat, place your hand underneath the mat next to the retention hook. Lift the mat up slightly and pull the mat toward the seat to unlatch the hook.
